Professional Summary

Passionate full-stack web developer well-versed in the MERN stack, demonstrating prowess in independent and team project development. Rapid learner with a knack for assimilating new tech stacks, underscored by a proactive attitude towards leveraging generative AI. Adept in combining technical acumen and effective interpersonal skills to drive project success.

Projects

RecipeRadar [Live Demo Link](#) [Github Repo Link](#)

HTML CSS JavaScript Python Django

MySQL Vue.js Tailwind CSS

- Developed RecipeRadar, an AI-powered cooking companion.
- Implemented user registration and authentication features.
- Managed recipe CRUD operations and ensured seamless user experience.
- Enabled users to contribute by adding reviews and rating recipes.

PetConnects [Live Demo Link](#) [Github Repo Link](#)

HTML CSS JavaScript React Chakra UI

MongoDB Node.js Express

- Collaborated on PetConnects, a pet adoption platform.
- Created user registration and authentication functionalities.
- Specifically contributed to the login and signup pages and worked on the admin side.

Bewakoof Clone [Live Demo Link](#) [Github Repo Link](#)

HTML CSS JavaScript React Chakra UI

- Designed and developed a fashion e-commerce website inspired by Bewakoof.
- Included features like user log-in, wishlist, sorting, filtering, and search capabilities.
- Ensured efficient pagination for the product listings.
- Achieved a responsive design for a seamless user experience.

Experience

ICAR-CIFT, Kochi | Graduate Apprentice

February 2020 - February 2021 (1 year)

- Designed and developed the Automatic Fish Feed Dispenser. Assisted in the development of the Hot Air Assisted Continuous Infrared Drying System.
